

What in the world are you trying to hide? Big business like the Clear Channel is making a mockery of the communication system. We can't get bias reporting anymore, because the Rupert Murdochs of this country are ramming their views down the throat of the american people. When will the deomcratic views be heard and seen? The democratics will have spend a large amount of money to get 60 seconds worth of news coverage. When you watch local televeision the commerical are conveniently on at the same time and the information they provide are almost identical. If you don't like it change the channel approach is crazy when all the channels are the same. Keep all the news in the family (Bush,Republicans and big businesses.)
